

Are you ready for take-off?

2nd Transnational Meeting

The second Learn&Fly transnational meeting took place on July 19th-20th in Matosinhos, Portugal. The meeting was hosted by INOVA+ and it was vital to analyse the current state of the project, to outline the plans for the next months of project implementation, and particularly to discuss the competition specificities regarding the plane building.

Competition Approaching!

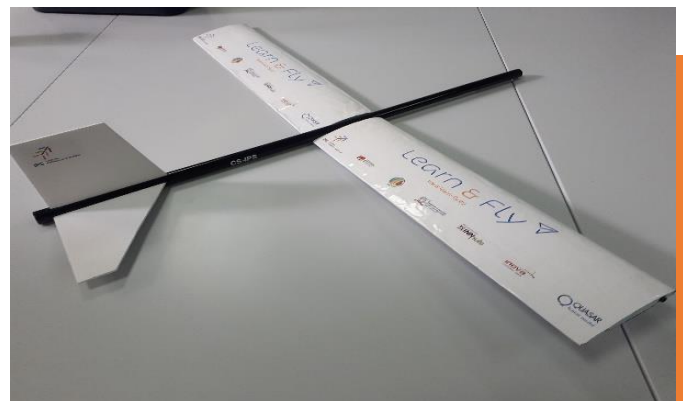

The competition is one of the central Learn&Fly activities! Students will be called to build an airplane, using a set of specific materials and then test its flight. This competition is divided in two stages. First, there will be a national stage in each partner country - **AeroDays**. Afterwards, the national winners will compete in the final international event, in Poland - **AeroWeek**. This initiative includes both blended/online and face-to-face activities, involving pupils of different schools.

At the beginning of the 2018/19 school year, the project partnership will be launching the national competitions in Portugal, Poland and Spain - be alert and don't miss the opportunity to participate! Materials related to the competition will soon be available on Learn&Fly website.

L&F on KAAT Workshop

On July 10th, QUASAR, INOVA+ and IPS were present at KAAT Project workshop under the theme "Smart Qualifications for Air Transport Occupations", which was a great opportunity to spread the word about Learn&Fly project!
