

Cabin Crew, prepare for take-off!

National Competitions

The competitions are one of the central Learn&Fly activities! Students were called to build an airplane, using a set of specific materials and then test its flight. During May, partners from Portugal, Spain and Poland hosted the Learn&Fly competitions! Students that participated in the competitions had the opportunity to show their airplane projects, compete to see which plane flew further and above all have fun while learning! At the same time, these events counted with presentations on the project results and promoted the exchange of experiences among students, teachers, parents and vocational counsellors.

International Multiplier Event

The first International Multiplier Event took place at Instituto Politécnico de Setúbal, on the 14th February 2019, together with the 3rd partnership meeting. During the event, the Learn&Fly project was presented. The day counted with different presentations, including talks from Katarzyna Śliwa-Martinez from INNpuls, Ricardo Cláudio from IPS and Rita Garcia from QSR. All project results were presented, namely: STEM KIT; CAREERS KIT and CHALLENGE!
